

IADC has recently completed a website and infrastructure update.

With this update, we need each existing IADC member/user to create new login information (username and password) that will connect with your existing IADC account. If you are a brand-new user, we need you to create an account in order to register for any IADC event.

Please follow the instructions below on how to do this.

[CREATE YOUR ACCOUNT LOGIN](#)

STEP 1)

Visit the [“Login” page](#). You will click the “No account? Create one” link.

STEP 2)

On the “Create account” page, type in your email address (which becomes your username). Your username is the primary email address you have on file with the IADC. (If you are a brand-new user, use your preferred email.)

Type that email address into the “Email” field and click “Next.”

STEP 3)

You will receive an account verification code via email – check your “other” folder if you don’t see it right away! The email address it will come from says “International Association of Defense Counsel (via Microsoft)” – account-security-noreply@accountprotection.microsoft.com.

Enter the verification code in your browser and click “Next.”

STEP 4)

After that, enter minimal account details:

Create your own Password – Please choose a complex password 12+ characters long. (Your primary email address with IADC is your username.)

Add your First Name and Last Name.

After adding your details, click “Next.”
