

Kevin Teen  
Kittyhawk.io  
San Francisco, California

Kevin Teen is an Account Executive with Kittyhawk.io, a drone operations and fleet management platform used by some of the largest UAS operations in the world. Kittyhawk helps departments of all sizes better manage their UAV operations, keep pilots safe and compliant, while also enabling the future growth of the industry. From a young age, he was captivated by RC helicopters which led to him pursuing aviation and most recently becoming 107 certified. Transitioning from the electronic manufacturing industry, he enjoyed working with engineers on many types of designs; commercial and military, manned and unmanned. He also has experience working in airport environments and with airline service companies. Kevin is a graduate of Embry-Riddle Aeronautical University, Magna Cum Laude, focused in Aeronautics, with minors in Management and Aviation Safety.
